HOZELOCK

Hozelock's Innovations for 2019

Hozelock Pure Kit and Tank - Page 6

A new addition to the Hozelock Pure sprayer range - this handy kit comes with a 1.25l sprayer for application of natural and homemade recipes for weeding, pest control, feeding and cleaning the house that is effective, accurate and fast.

Also included is a tank to store your preparations, a dosing spoon for easy application and a recipe booklet to get you inspired!

Bokashi Composter - Page 6

All kitchen food waste can be fermented in the Hozelock Bokashi airtight composter, not just vegetable waste, but table scraps, meat, fish and dairy too. All your kitchen waste goes into your garden, not into landfill.

With the addition of Bokashi Bran, a combination of bran and effective microorganisms, it delivers a fertilizer liquid in just 5 days, and nutrient-rich compost for your plants in just 15-20 days.

Biomix - Page 7

Garden without chemicals with Hozelock Biomix to easily make liquid feed or natural insecticide for your plants. It's easy with the Biomix, which has a lid and mixing action to ensure that the comfrey leaves decompose quickly whilst the pungent smell is contained within the mixer.

An integral strainer and tap makes removing the plant debris and draining the liquid into storage bottles easy. The resulting nutrient-rich compost tea can safely be used on all garden plants and the plant debris makes a top quality compost activator.

Seringa Sprayer - Page 48

Reach new heights with the versatile multipurpose Seringa sprayer, ideal for washing cars and treating roofs, gutters and trees.

It comes with a 60cm fibreglass, ergonomic lance handle and the tank stays on the floor at all times connected to a 10m hose for user ease. The Seringa is always ready to use - just insert the hose into the container and you are ready to spray.

Plant a Pot Campaign - Page 50

We've got a bee in our bonnet about helping our friends the bees! With the help of Bizzi, our friendly bee, we are encouraging everyone to plant one or more pots of bee friendly plants to help save the bees.

Take a look at how you can make a difference by bringing the campaign to life in your store and digitally with our inspiring point of sale material.

Natural Gardening

Get into green with natural gardening. Today's gardeners are reaching less for chemicals and more for organic and natural solutions to create their green garden.

Gardens can flourish naturally with the help of Hozelock's new Pure range - a collection of gardening equipment that helps consumers to really connect with their gardens and to care for the environment at the same time. Combining design features that ensure the highest effectiveness and ease of application for natural products, it's a sure recipe for success.

Hose Storage

Keep your hose tidy, protected and ready to use with a fuss-free storage solution from Hozelock.

Our reels and carts make it a breeze to get water where you need it around the garden.

Use a compact reel to get the most out of small gardens and balconies, or choose the comfort and practicality of automatic rewind and automatic layering for larger gardens.

Auto Reel - the automatic rewind hose reel

Watering your garden and storing your hose is so easy with Auto Reel.

It smoothly unwinds only the amount of hose that you need.

When you are finished, the automatic rewind system effortlessly stores the hose away, with no kinks or tangles.

Use all over your garden

The multi direction wall hanger rotates 180° to follow you around the garden or sit neatly against the wall.

Always ready to go

The built in hose stop prevents the hose fully retracting so it is easily available every time.

Convenient storage

The hanger on the 2401, 2402 and 2403 has storage space for spray guns and accessories to help keep your garden tidy.

Quick to fit or remove

The wall hanger design and carrying handle mean you can quickly put the Auto Reel on the wall or take it off again.

Safe and secure

Features a child lock for reassurance and a padlock* fixing point for security.

*Padlock not included.

Not all connectors are made equal, see what makes ours the best

1 Water Stop Valve (AquaStop only)

Manufactured from ABS for impact resistance and rigidity. Stops water after removing the watering device.

2 Connection Grip

Manufactured from Dupont Delrin® Acetal with a silicone additive for ease of use. Triple connect point for the strongest possible connection.

3 Outer Sleeve

Manufactured from ABS for impact resistance and strength with soft touch over-moulding for an enhanced grip.

4 Tough Inner Core

Manufactured from Dupont Delrin® Acetal, one of the most crystalline engineering thermoplastics, to bridge the gap between plastics and metals.

5 Connection Grip

Polypropylene teeth stay resistant to repeated stress and provide a secure hose clamp.

6 Hose Tail (Plus and Pro only)

Manufactured from tough, but flexible Polypropylene for a secure hose connection that prevents kinking.

More information on all our products can be found on www.hozelock.com

Why Automatic Watering?

What are the benefits of Automatic Watering?

Have some time off

During the summer months your plants need an increased amount of water, requiring daily watering which can sometimes become a bit of a chore.

Automatic Watering systems take this burden away meaning you have more time to do other things.

Water more efficiently

Automatic Watering systems deliver more controlled watering directly to the roots, reducing water wastage through evaporation or inaccurate watering.

Not only does this save water, it could also save you money on your water bills.

See your garden bloom

So many plants are affected by both under and over watering, which can potentially kill them or make them more prone to disease.

Regular controlled watering produces stronger, happier and more vibrant plants making your garden look great with less work.

Get out more

Automatic Watering systems allow you to be away from home with the assurance that your garden continues to be watered.

No more bothering the neighbours and family or coming back to dead plants.

Why Easy Drip?

What are the benefits of Easy Drip?

Simply install in only 15 minutes

Setting up an Automatic Watering system has never been easier thanks to Easy Drip.

Clever drippers make installation and adjustment a breeze, whilst a refined range of components ensures that selecting what you need for your outdoor space is kept simple.

Easily adapts to any outdoor space

The Easy Drip range delivers simple solutions to ultimately control, distribute and deliver water around your outdoor space.

Whether you have plants in containers or borders, Easy Drip can be easily adapted to your watering requirements.

Quickly adjusts to water any size plants

The Easy Drip drippers are fully adjustable allowing you to turn them off or open them to water up to 40l/h.

This allows you to ensure each plant gets the right amount of water to help them thrive.

Compatible with all systems

Whether you have an existing Automatic Watering system or are looking to install one for the first time, you can be assured that there will be no issues with compatibility.

Easy Drip works seamlessly with all existing systems allowing you to join or extend them together with no fuss.

Easy Drip System

Hozelock Easy Drip is a quick and easy automatic watering system for any garden. Simple to install, the system saves time, water and effort, whilst improving plant growth.

- Limited number of components makes understanding and installing the system easy
- Modular kits allow you to easily grow your system
- Simple to build from scratch or add to an existing irrigation system

Easy Drip Kits - specially selected components to make installing Easy Drip simple

Automatic Watering

Automatic Watering is a system that takes water from the tap to your plants using a simple network of narrow pipes and outlets hidden in the garden. This can be controlled manually or by an electronic water controller.

An Automatic Watering system takes the work out of watering. It waters your plants properly all through the season, even if you are away.

If you are looking for a simple system to water your container plants when you are away on holiday, or a sophisticated system to water your entire garden, you'll find that an Automatic Watering system helps you manage your garden much more easily, allowing you to spend more time doing the things you want, rather than the things you have to.

Controllers - control your daily watering automatically

Sunrise and sunset. The best time to water your garden, to avoid leaf scorch and excessive evaporation, is at sunrise or sunset, but it is not always convenient to be available to do it yourself at these times of the day.

Sensor Controllers

The HozeLOCK Sensor Controller range of Automatic Watering controllers will take care of this for you, as they include a daylight sensor that automatically adjusts your daily watering schedule to start at sunrise and sunset. Both units are supplied ready to use with the most popular watering schedule of twice a day for 10 minutes; simply insert batteries to get started.

There are two models available in the range, the Sensor Controller that automatically waters every day at sunrise, sunset or both sunrise and sunset. Alternatively the Sensor Controller Plus has the added functionality of selecting every day through to once a week.

- Electronic water timer with daylight sensor that automatically adjusts daily watering schedule to start at sunrise and sunset.
- Waters once or twice per day for a duration ranging from 2, 5, 10, 20, 30 or 60 minutes.
- Adjustable watering schedules from every day to once a week.
- Water now function ranging from 10 minutes up to 60 minutes.
- Requires 2 x AA batteries and includes battery check function.

Cloud Controller - the future of automatic watering

Control your garden watering from your mobile phone! It doesn't matter if you are on holiday or at work - your plants will no longer need to suffer if weather conditions change.

- Easy to use app to control your garden watering from your mobile (Apple or Android operating system) with Hozelock hub and remote tap unit.
- App allows you to remotely set, pause and adjust watering schedules.
- App includes a local weather summary and push notifications to keep you informed about changes to weather patterns.
- Ideal for when you are away from home and weather conditions change, to remotely pause and adjust schedules.
- Each hub can control up to 4 remote tap units.

Control your garden watering from your mobile phone

- 1 Mobile app allows you to set the watering schedule whilst away from home.
- 2 Hub plugs directly into internet router for secure connection and simple installation.
- 3 Hub links wirelessly with remote tap unit that can be positioned up to 50m away in the garden.
- 4 Each hub can control up to 4 remote tap units.

*Requires Smartphone with Apple iOS or Android operating system, Ethernet Port and internet connection. Requires 2 x AA 1.5v Lithium/Alkaline batteries - not included.

Cleaning

The Pico Power is the pressure washer that combines convenience and power.

The high pressure hose is lightweight and delivers effortless cleaning at 140 bar (max.).

The unit is easily moved around your home and stores neatly away afterwards.

Every component has a storage point on the Pico Power unit, so it is ready to go whenever you need it and stays clutter free.

Sprayers

Sprayers can be used for a number of different purposes around the garden, including killing weeds and protecting or feeding plants.

The Hozelock sprayer range comes in a number of sizes to ensure they can treat your garden without the need to refill constantly.

Hozelock 'Last Drop' technology ensures zero wastage so every last drop of fertiliser or chemical is used before refilling.

Plant a Pot

With the help of Bizzi we are encouraging everyone to help save bees by pledging to plant one or more pots of bee-friendly plants.

Hozelock's 2018 campaign has proven that gardeners are keen to engage.

Take garden watering beyond the watering aisle...and grow your profits.

"Bees need our help!"

For two decades bees have been disappearing by the millions.

Bees are incredible pollinators, and they provide one third of the food on our plates.

We need them and they need our help!

Plant a Pot can help your business

Display, pots, plants and compost - even bee hotels - together with Hozelock watering by using our eye catching point of sale displays.

With displays throughout your centre it couldn't be easier to encourage consumers to plant a pot to save bees and to increase their basket size too!

IN-STORE

With support from Hozelock's Plant a Pot POS, you will be able to create a cross-category story, drive impact and engage with consumers around your store.

Add a range of products from relevant categories to tell the story and to inspire purchase, all the time knowing that you too are helping to save bees!

EVENTS

Why not encourage consumers to increase dwell time in all areas of your store with fun events for all. They'll leave your store feeling positive, knowing they have done their bit for bees.

Hozelock can provide bespoke artwork and advertising materials to support your event throughout your communications.

DIGITAL

Bring the campaign to life on your website and social media. Hozelock can offer the digital assets to give you a full marketing support package.

Our campaign had great success online in 2018 with over 15,000 pledges in just 3 months! That's a high value potential sales opportunity ready for you to take your share.
